

X2JET PLUS TOUCH

Markoprint
PREMIUM PARTNER

HIGH QUALITY MADE IN GERMANY

The Markoprint X2JET plus Touch is a 5.7" high-resolution TFT color touchscreen display and controller. The X2JET is used to communicate to a printhead that does not have its own intelligence as well as visualize print jobs and statuses of certain Markoprint printheads that do not have a built-in display. This unit controls a wide array of printheads and head configurations that can adapt to almost any application. It supports four different print technologies: HP, LX, XR & MX Class.

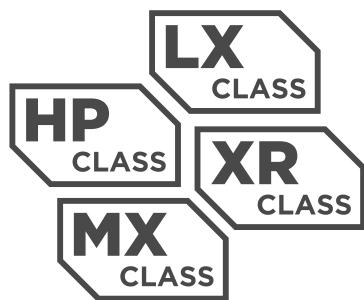

The X2JET can operate 1 or 2 printheads of the same or different print technologies simultaneously, giving you the options to print on two different sides

of a package, two different production lines, as well as the ability to stack printheads to get a larger print height.

Two configuration options are available depending on the application requirements that allow for printing alphanumeric text, 1D & 2D barcodes, graphics, live date, time, & sequential numbers.

High resolution codes at fast speeds with excellent adhesion on plastic, glass, metal, as well as other porous and non-porous substrates.

Simultaneously print essential information while ensuring legibility with this high-resolution unit.

General information	
Supported printing technologies	HP, LX, MX, XR
Max. number of print heads	2
Max. number of production lines	2
Max. print height:	
HP	25
LX	25
MX	200
XR	142
External Sensor	2x
Internal Sensor	-
Encoder	2x
Status / Alarm outputs	4x
Potential-free outputs	4x
Inputs	8x
USB-A for USB Stick	+
USB Interface	USB B
EIA232	+

ADVANTAGES

- » 5.7 touchscreen and keypad for easy operation
- » Messages are created with the included Software
- » Create messages directly from the touchscreen controller
- » Control up to 2 print heads
- » Mix print technologies. Run up to 2 supported print technologies simultaneously
- » Data selection via USB, network connections, or EIA-232
